Reading

2	<p>متن زیر را بخوانید و به سوالات داده شده در هر قسمت پاسخ دهید.</p> <p>Microbes are really wonderful. They live all around you, on you and inside you! Microbes are very small, so you can't see them. Some microbes make you sick but most others keep you healthy and even help you to fight disease. There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things.</p> <p>Bacteria and viruses are two important types of microbes. Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without some bacteria.</p> <p>Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses. They usually attack your body and make you sick!</p> <p>❖ True / False</p> <p>29. Microbe is an important type of bacteria. a. True b. False</p> <p>30. There are only two types of microbes. a. True b. False</p> <p>❖ Choose the best answer.</p> <p>31. Which sentence about bacteria is NOT CORRECT?</p> <p>a) All bacteria make you sick</p> <p>b) Bacteria are larger than viruses</p> <p>c) Bacteria have only one cell</p> <p>32. Which one about viruses is CORRECT?</p> <p>a) They can live alone</p> <p>b) They are the smallest microbes</p> <p>c) Some viruses are useful</p>	-11

3	<p>متن زیر را بخوانید و به سوالات داده شده در هر قسمت پاسخ دهید.</p> <p>The sun is, at the center of solar system, and the planets around it are among the wonders of creation. Venus is the second planet from the sun which is sometimes called Earth's sister. This is because their sizes and weights are alike. Like Earth, it has clouds and wind. Many believe that Venus and Earth were even more alike in the past but something happened and changed all of this. It's the second brightest object in the sky after the moon. Venus and Earth are also different. The clouds on Venus are yellow because they aren't made of water like clouds on Earth. Venus doesn't have life and it doesn't have water like Earth. There is no way that anything can live on Venus at all. It takes two hundred and twenty days to orbit around the sun, for Earth it is three hundred and sixty-five days. Venus has no moons and rings. It is a cloudy, hot planet. Strong winds blow all the time. It is the only planet named after a female and it is thought that it was because it is the brightest planet.</p> <p>❖ True / False</p> <p>33. Clouds on Venus and Earth are alike. a. True b. False</p> <p>34. You cannot live on Venus because it doesn't have water. a. True b. False</p> <p>❖ Answer the following questions.</p> <p>35. How long does it take for Venus to go around the sun?</p> <p>36. Why is Venus called Earth's sister?</p>	-12
